

Personal Professional Development Plan

- ✚ Before working in the USA , I didn't know or use graphic organizers so much. Now , I have incorporated them into my lessons and I know there are many more used for different purposes. Therefore , I am interested in getting to see how other teachers use them and learn many more.

- ✚ In Illinois , I became acquainted with “ Grade Machine “ and I used it to work out my student's grades. As far as I know , this program offered more possibilities that I never got to use so I'd like to deep my knowledge of it or get to know other grading systems with the purpose of adapting them in Spain.

- ✚ If I am hired to teach Spanish , I'd like to take this opportunity to create new materials and resources , in the same way as I have created to teach ESL; laminated charts , cards , games among others.

- ✚ Once I am back in Spain I 'd like to continue being a teacher trainer for Spanish teachers. I have already initiated an insight into this and I hope my experience in the USA helps me to accumulate more knowledge.
