To whom it may concern,

I would like to express my interest in any future teaching vacancies you may offer for teaching Language Arts, English as a Second Language, Spanish as a foreign language or French I.

With my twelve years experience teaching second language learners, I feel I have many things to offer to the students and teachers in the US. My expertise in the teaching of foreign languages is my main asset. I am also fully committed to positively contributing to the lives of my students with my experience and unique sense of humor which make my lessons fun and engaging for all

My experience is mainly with high school students, although I would also welcome the opportunity to work with smaller children at the elementary level.

I have a Bachelor's and Master's Degree in English and studies at the university level in methodology of Spanish as a foreign language. As for my experience teaching French I was a private tutor back in Spain and although I don' t have proven record of teaching experience in this I can say that I grew up and lived in France during many years therefore my awareness of the language was fully developed.

My interest in working and living in the US started many years ago based in my needs to grow professionally. I was able to teach in Illinois in 2005-2006 and I am looking forward to continue with this continuing process of learning and improving my teaching techniques.

Respectfully yours,

Visi Alaminos
